Hair Gel—cheap big tub
Perm Rolling Papers
Comb
Hair Spray
Medium Hair Clip
Hair Net (Crochet type)

I can do it for you...for \$40
Email me: hbcalipop@yahoo.com

STEP 1: Gel front of hair and put in Half-Up Style
Be sure to slick back all wispies and Hair Spray

STEP 2: Starting from the bottom, make a small part across the bottom of hair. Take 1 to 2 inches of hair, gel that section, put a Rolling Paper on the end of hair and roll up hair. When you get near the top turn the curler vertical. Continue all the way across bottom. After row is complete do it again above and keep going until all hair besides ponytail is in curlers.

STEP 3: Put curlers in ponytail, the same way as all other curlers.

STEP 4: Hair Spray all curlers and cover with Hair Net

STEP 5: Curlers should stay in at least 10 hours. More if you use more gel or have Thicker hair....takes time to dry.

STEP 6: Taking out Curlers

When taking out the curlers be sure to unwind as best as possible don't just pull. You will also need to unwind them vertically to help make the curls ringlets. Start from the bottom and work your way to the top leaving the ponytail for last. Hair Spray each row as you go for more hold.

TIP: Hair that is a little dirty works best....it's not so silky.
